EXPERIENCE

Bitrefill Stockholm (remote)

AI Infrastructure Engineer Sep 2025 - Sep 2026

- Co-built the internal AI agent platform adopted by ~85% of the company.
- Designed its MCP tool domains, permission tiers, and human-in-the-loop approval flows.
- Built the sandboxed VM layer (thousands of VMs/month) letting agents touch production safely.
- Built most of its UI: the Slack agent experience, web run viewer, and draft editor.
- Scaled to 100,000+ audited tool executions monthly; owned reliability, deploys, and CI cost.
- Extracted the platform from the company monolith into its own repository.

Blockchain Developer Jan 2025 - Aug 2025

- Core engineer on the crypto payment rails: Solana, Tron, and new-chain work.
- Integrated USDT on Solana, TON, Tempo, and internal assets end-to-end, node to checkout.
- Rebuilt Solana payment detection as real-time streaming with automatic provider failover.
- Led the ethers v6 and Tronweb v6 migrations; sped up ERC-20 payment confirmation.
- Automated treasury sweeps to exchanges with fee-aware routing and per-sweep accounting.

Backend Developer (internship Jan-Mar 2023, hired full-time Apr 2023) Jan 2023 - Dec 2024

- Core developer of the Bitrefill Card, and its sole backend owner for a period.
- Built the card's KYC pipeline, webhook processing, and SEPA/crypto/Lightning deposits.
- Delivered the physical card program, real-time notifications, localized emails, reporting.
- Shipped USDT on Polygon, DASH/LTC/DOGE top-ups, web3 login, LiFi swaps, eSIM flows.
- Interned first (admin tooling, EVM/Tron fee trackers); hired full-time after three months.
